KCGM MILL EXPANSION

Now one of the largest milling complexes in Australia, KCGM's new expanded Mill is set to unlock the future of ore to gold bar processing. See inside for more.

Community ENGAGEMENT

LOOKING INTO THE PAST WITH THE WILLIAMSTOWN MINER'S COTTAGE

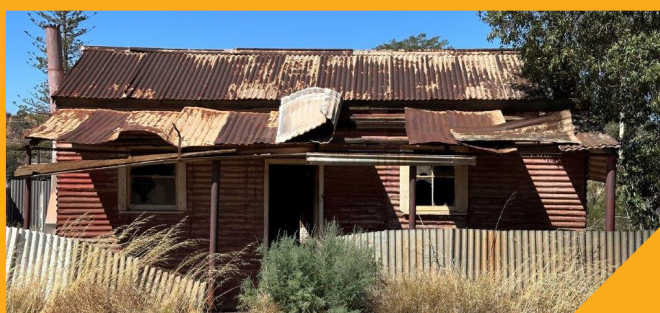

A collaborative effort has seen a historic miner's cottage relocated from Williamstown to the Hannans North Tourist Mine (HNTM) in an effort to preserve the region's important history.

The early 1900s cottage will be restored to its former glory before being opened as an interactive exhibit, while the exterior of the cottage is now on display for locals and visitors to enjoy.

The relocation was a team effort between HNTM, Northern Star and Demolition WA, with the next step welcoming the wider community to share their memories and stories to ensure we are preserving the history and heritage of the beloved cottage.

Restoring the original bricks to the fireplace and the original veranda around the cottage will be just some of the works completed during the restoration project. New floorboards and windows will be added, along with furniture to return the cottage to its homely days.

Information or photos of the Cottage can be sent to hannansnorth@nsrltd.com.

Impact MANAGEMENT

Northern Star is progressing development of the KCGM Fimiston Underground Operations beneath the Super Pit. As part of this work, exploration development and bulk sampling is underway as a key stage of advanced exploration to assess mining methods and better understand the ore body.

Our underground teams use a range of methods to reduce vibration and minimise impacts on nearby communities. This includes:

- Drill hole sizes reduced from larger productive diameters to further reduce vibration impacts
- Precise programmable electronic detonators used to ensure each individual blast hole is initiated at a unique time
- Only one primary hole fired at a time to reduce the instantaneous charge
- Careful blast design and sequencing with respect to void ratio and direction of firing
- Active blast modelling reviews and consistent monitoring

GROWTH PROJECT *Update*

THE NEXT ERA OF PROCESSING WITH AN EXPANDED KCGM MILL

The next era of KCGM has begun with commissioning of the expanded processing plant now underway. Our team is unlocking a simpler, more productive mining system, creating a 27Mtpa processing hub.

This will make it one of the largest milling complexes in Australia and will use an integrated system to process multiple ore sources with less handling and increased throughput.

Some areas of the existing plant have been retained, some repurposed and others will be taken offline. This has reduced complexity and allowed for larger processing units with the focus on a simplified operating model.

In the future, our product will be processed from ore through to its gold bar form all in one hub. Chief Technical Officer Steven McClare said the expanded hub was built with the future in mind.

"The operating efficiencies that come with the new mill will enable us to better match the orebody," he said.

"This was never about building a bigger plant. It was about replacing the complex regional system of shifting dirt between plants and adding cost, into a single, world-class processing hub."

NEW EQUIPMENT AT THE SUPER PIT LOOKOUT

We are excited to welcome three new massive additions to the Lookout!

Now on proud display, the CAT 793C Haul Truck is taking on a new role after moving approximately 250 million tonnes of ore and waste rock in its working life at the Super Pit.

It is joined by a LeTourneau Loader with an impressive track record. Over its 13-year working life, the loader helped move millions of tonnes of ore and waste rock. A Komatsu PC8000 Shovel is also on display after having made a significant contribution to our operations.

LET'S GROW *together.*

LOCAL PEOPLE *Local Stories*

MEET SHADE AND LAYTON, FIRST-YEAR APPRENTICES AT OUR KANOWNA BELLE OPERATIONS

As first-year apprentices, Shade and Layton joined Northern Star's Fixed Plant Team, with Shade embarking on an Electrical apprenticeship while Layton is undertaking a Mechanical apprenticeship.

Starting their journey with Northern Star has given the duo the chance to learn new skills, work with great people and build careers close to home. They said it was rewarding to be part of a team where they are supported to grow while contributing to the community they live in.

"People onsite look out for each other. You come in to learn a trade, but you also become part of a team pretty quickly," Shade expressed. "Starting at the same time as Layton, we've been able to learn alongside each other and grow in our roles together. Having that support makes a real difference to how you show up and the work you do."

Layton said there was a strong sense of community on site. "Working with supportive and knowledgeable people really helps to keep building your skills and confidence," she said. "I enjoy being hands-on, getting involved in the job and learning how things work."

Looking to build a career that's hands-on, challenging and full of opportunity?

Northern Star's Apprenticeship Program provides you with the skills, experience and support to help you build a successful career and develop into a highly skilled tradesperson.

Supporting LOCAL CAUSES

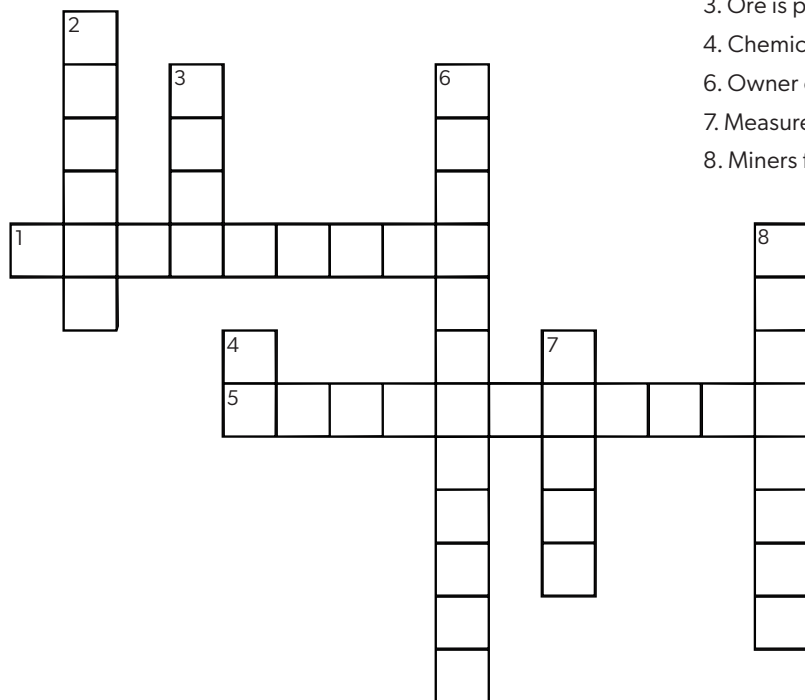

Northern Star was proud to support the Goldfields Women's Refuge (GWR) with a donation of household furniture and white goods to help service 14 new housing units, boosting support for at-risk women and children.

The Goldfields Women's Refuge has been supporting women and children in the region since 1979, providing a safe place for those escaping family and domestic violence.

The donation included beds, couches, washing machines, televisions, kitchen items and more - with Northern Star staff helping Tracey and Suzie from GWR deliver the items in July.

Partnership SNAPSHOT

BOULDER PRIMARY SCHOOL RECYCLING FUNDRAISER

Our teams donated three big bags of Containers for Change recycling to the waste warriors at Boulder Primary School to support their Year 6 camp.

The students have been busy sorting the containers for the Containers for Change program, earning 10 cents per item to help their fundraising while also learning more about recycling and how it can benefit our community.

Together we can make a difference, and our staff were happy to hear their recycled containers were not only keeping our environment cleaner but also helping the community.

BRIGHT FUTURES STEM

We recently visited Kalgoorlie Primary School and St Mary's Primary School students with our Project Geologist Meaghan who shared first-hand knowledge into a career in Geology as part of the Bright Future STEM program.

Getting the chance to learn directly from an industry professional, students explored the many different career paths in the world of STEM. Programs like this play an important role in shaping the future of mining, inspiring the next generation of leaders and innovators.

LET'S GROW *together.*

HOPE HAMPERS & BREAKFAST CLUB

Delivering hope, one family at a time - that's the mission behind Kalgoorlie-Boulder Community High School's new Hope Hampers, working alongside Breakfast Club. Providing nutritional and fresh food to students, this program extends beyond the school grounds and into the homes of local families.

Students who are fed and healthy are able to focus and learn, so we're proud to help supply fresh food for the program. Our team also enjoys lending a hand at the Breakfast Club - where toasted sandwiches, fruit and scrambled eggs are amongst the most popular menu items.

CULTURAL LEARNING

Students at South Kalgoorlie Primary School are learning, listening and growing with their cultural education, including recognising Reconciliation Week with a community-led celebration. Through art, stories and connection, students had hands-on opportunities to explore Aboriginal culture and language.

NAIDOC WEEK

A big thank you to everyone in the community who joined us in celebrating NAIDOC Week, 6-12 July. From the Community March and Opening Ceremony in Kalgoorlie-Boulder to events for local young people and Elders, it was great to see our community come together in such strong support.

Experiences like this remind us of the importance of community and the sharing of cultures, creativity and stories that bring us together. We are proud to support our community in creating inclusive events which celebrate what makes Kalgoorlie-Boulder home for so many.

MULTICULTURAL FESTIVAL

Hosted by the City of Kalgoorlie-Boulder, this year's Multicultural Festival was alive with more than 25 food stalls and live entertainment for all. We're proud to be the City's Event Partner, helping bring the community together with vibrant, family friendly activities.

UPCOMING *Events*

COMMUNITY CONNECT

5-7pm, Eastern Goldfields Community Centre

Meet with members of our Community, Environment and Mining teams to learn more about our long-term plans and opportunities for the region.

KALGOORLIE-BOULDER ART PRIZE

10am-3pm, Goldfields Art Centre

See an acquisitive collection of visual arts from a variety of mediums, created by locals and artists from across the country

COOLGARDIE DAY 2026

9am-4pm, Bayley Street, Coolgardie

An annual celebration dedicated to family fun and community spirit. Join a circus, enjoy the food vans or get your face painted - there is something for everyone.

LORNA MITCHELL SPRING FESTIVAL

9am, Hammond Park

Celebrate our community by enjoying more than 100 stalls filled with art and craft, live entertainment and activities for the whole family.

The Eastern Goldfields First Nations Council hosted the 2026 NAIDOC March and Community Celebration in Kalgoorlie-Boulder.
