ASX Listing Rule 5.19 and 5.23 Statement

This announcement contains current estimates of Northern Star Group and KCGM Operations' Ore Reserves and Mineral Resources. The information in this announcement that relates to the current Ore Reserves and Mineral Resources, and exploration results, has been extracted from Northern Star's ASX release entitled "Resources and Reserves Update" dated 3 June 2026 available at www.nsrld.com and www.asx.com ("Announcement").

Northern Star confirms that it is not aware of any new information or data that materially affects the information included in the Announcement other than changes due to normal mining depletion during the four month period to 2 August 2026, and, in relation to the estimates of Northern Star Group and KCGM Operations' Ore Reserves and Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the Announcement continue to apply and have not materially changed. Northern Star confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the Announcement.

Assumptions made in relation to the Ore Reserves and Mineral Resources underpinning the production targets in that announcement are (in summary):

- Current operational capital and operating cost structures,
- Current mining and metallurgical performance,
- The gold price, exchange rate, dilution allowance and mining recovery rates are as set out in each prior public report referred to in ASX Listing Rule 5.19 disclosures, and
- 5-year gold production profiles are based on 100% current JORC compliant Ore Reserves.

These figures represent JORC 2012 Mineral Resources and Ore Reserves for the combined assets owned by Northern Star.

Disclaimer and Forward-Looking Statements

Northern Star Resources Ltd has prepared this announcement based on information available to it. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement. To the maximum extent permitted by law, none of Northern Star Resources Limited, its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this announcement or its contents or otherwise arising in connection with it.

This announcement is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this announcement nor anything in it shall form the basis of any contract or commitment whatsoever.

This announcement may contain forward looking statements that are subject to risk factors associated with gold exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, Resource or Reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates.

Rounding is applied in this presentation for the percentage comparisons and for all Ore Reserves and Mineral Resources figures. Mineral Resources are inclusive of Ore Reserves; and numbers are 100% NST attributable.

Authorised to release to the ASX by Stuart Tonkin, Managing Director & CEO.

KCGM: The Next Era

Renewables energy location

Fimiston III TSF

Thermal power station

Fimiston II (G) TSF

Processing hub

Elevating KCGM to the next era

Building a lower-cost operation

Designed to simplify the operation and reduce costs

Processing
Efficiency

Simple to operate
Simple to maintain

Operating
Efficiency

More flexibility
More value

Energy
Efficiency

Lower use
Lower cost

Structurally breaking the cost cycle

Processing Efficiency

Simple to operate
Simple to maintain

- Fewer and larger units
- Ease of maintenance
- Systematic operation and tech-enabled

Targeting significant reduction in processing cost per tonne at steady state (vs FY26)*

* On a real-cost basis, excluding future inflation assumptions. Steady state is expected to be achieved from FY29

Operating Efficiency

More flexibility
More value

- Integrating multiple ore sources
- Handling material once
- Enhancing equipment productivity

Unlocking a simpler, more productive mining system

Artistic impression of future renewable energy project

Energy Efficiency

Lower use
Lower cost

- Introducing renewables
- New thermal power station and distribution system
- Utilising existing power station

Improves operating economics with greater energy self-sufficiency and reduced emissions

Breaking the cost cycle

Structural cost resets creating a sustainable cost advantage

NORTHERN STAR
RESOURCES LTD

Delivering the Next Generation
Ready for production. Positioned for growth.

Mill commissioning and processing

Commissioning the expanded mill through a disciplined, staged ramp-up

A disciplined commissioning approach establishes a reliable foundation
for long-term processing performance

27Mtpa Fimiston processing plant

Expanded configuration - Early September tie-in

New expansion infrastructure - 18Mtpa

Fimiston - 9Mtpa

Early September tie-in

**27Mtpa
front end**

18Mtpa new

9Mtpa retained

Mt Charlotte - 4Mtpa

Operational readiness

Preparing the organisation for safe, reliable operations

Simplifying the Open Pit

Multiple Sources

Four open pits in the larger Super Pit

Optimise

Mining efficiency through simplification

Fimiston South

Preparing the next phase of production

Consists of Great Boulder and Ivanhoe cutbacks

Scale and inventory underpins future open pit production

18Moz

Mineral
Resources
429Mt at 1.3g/t

8Moz

Ore
Reserves
182Mt at 1.4g/t

Stockpiles provide mill feed security

- Stockpiles add resilience
- Ore handled once, reducing mine constraints
- Less rehandling of stockpiles

Future plant feed flexibility

Improved efficiency

153Mt at 0.6g/t Au
3.2Moz

A two-mine underground strategy

A mature foundation. A growing future.

Mt Charlotte Foundation

- Established production
- Proven mining system
- Reliable mill feed

Fimiston Underground Growth

- Expanding production
- Next generation
- Future growth engine

Fimiston Underground to drive improved grade profile

Majority ore sources currently from Mt Charlotte

At Fimiston Underground:

- Grade expected to increase as volumes grow
- Development activity remains high contributing to lower grade
- 1Mt mined in FY26 of the 35Mt Ore Reserve
- Higher-grade Resources provide upside potential through future Reserve conversion

As Fimiston Underground ramps up, its higher-grade Reserve base is expected to lift the overall underground mined grade

NORTHERN STAR
RESOURCES LTD

Unlocking the next decade
Extending mine life and supporting regional opportunities

Extending mine life through Resource conversion

Converting discoveries into decades of production

Regional growth opportunities

Kalgoorlie district

1,543km² tenement package

A district-scale mineral system supporting long-term growth around the expanded KCGM processing hub

Near Mine: Extend existing operations

Underground: Build future production

Regional: Provide long-term optionality

27Mtpa processing platform unlocks value across the district over multi-decades

Core processing facility

Future-proofing

Potential to automate manual processes, reducing costs

Integration of advanced technologies, increasing efficiency

Faster drill-assay-data turnaround

KCGM drilling continues to increase with district expansion

Future-proofed to accommodate growing demand

Laser-induced breakdown spectroscopy

47.6mm

47.6mm

Fast and Accurate

Advanced chemical analysis

Partnered with detailed mineral libraries creates high-resolution mineral maps

Delivers fast and accurate mineral quantification

Supports rock-type determination and mineralisation characteristics

Enhances geologists' decision making, consistency and models

Summary

- Creating one of the world's largest integrated gold mining operations
- A 27Mtpa processing hub delivering scale, flexibility and lower costs
- A district with multiple pathways for decades of growth
- Every future discovery is worth more on a larger, lower-cost platform
- Positioned to create long-term shareholder value

We have built the platform. Now we unlock decades of value.
