SURFACE MINE EMERGENCY RESPONSE COMPETITION

Emergency response teams from across the State were put to the test in a series of simulated scenarios with Northern Star KCGM crowned the winners. See inside for more from the Surface Mine Emergency Response Competition, hosted by Northern Star at the Hannan's North Tourist Mine.

GROWTH PROJECT *Update*

To support growth projects and extend the life of the Super Pit, the Noise Bund Realignment Project has been successfully completed. Commencing in January 2023, the project reached completion in March 2026.

The construction of the bund required approximately 1.95 million tonnes of material and achieved a final height of 15 metres. All construction activities were carried out during daytime shifts to minimise impacts on the surrounding community. Careful management of noise and dust was a priority throughout the project, with interactions with town closely monitored and managed as part of Northern Star's commitment to being a responsible operator.

As part of the Fimiston South project, a portion of the existing environmental noise bund towards the South Boulder industrial area was realigned westward, as it fell within the project footprint. This realignment ensures an effective noise barrier is maintained between the Super Pit and the City of Kalgoorlie-Boulder.

WORKFORCE ACCOMMODATION NOW OPEN AT *Yarri Village*

Northern Star's 300-bed Yarri Village is now open, welcoming workers involved in our growth projects with Kalgoorlie-Boulder business Drummond Solutions awarded the management and catering contract for the site.

General Manager – KCGM Growth, Nick Strong said Drummond Solutions were selected after a competitive tender process and awarded the 3 year contract with local community support a key focus.

"This award reflects Northern Star's commitment to supporting social and economic development initiatives that benefit our operations, our partners, and the broader Kalgoorlie-Boulder community," he said.

Drummond Solutions' General Manager Christie Drummond said it was a "big step" for the business, showcasing their hospitality-driven camp management style.

Community ENGAGEMENT

SURFACE MINE EMERGENCY RESPONSE COMPETITION

Three days of high-intensity action took place at the Hannan's North Tourist Mine with the Surface Mine Emergency Response Competition (SMERC) showcasing the rescue skills of mining teams across the State.

Fourteen teams from West Australian mine sites took part, including three from our Northern Star operations. They competed in a range of simulated disaster scenarios including firefighting, vehicle extraction, rope rescue, confined space rescue, first aid, team skills and hazardous materials response.

Northern Star KCGM was crowned the overall winner and their leader was awarded the Best Captain honour while Northern Star Thunderbox finished runner-up, and placed first in overall team safety. Kalgoorlie Operations came in first for the firefighting scenario.

With SMERC open to the public for the first time since 2022, hundreds of spectators flocked to Hannan's North Tourist Mine to watch the teams compete.

It reinforced beyond our sites that safety in our industry isn't just a statement – it is something we actively invest in, train for and continuously work at improving. One of the strongest messages from this event is collaboration. In a real emergency, no site stands alone. Neighbouring operations, other companies and emergency services all work together in response, for our teams and for our communities.

Central Regional TAFE Convention
Centre, Kalgoorlie, 8am-5.30pm

Hear the stories behind inspiring women from across the community with this annual event hosted by the Kalgoorlie-Boulder Chamber of Commerce and Industry.

TREE PLANTING DAY

Time and location to be advised,
Kalgoorlie

Join Northern Star volunteers and the Kalgoorlie-Boulder Urban Landcare Group team in planting new trees for our community and future.

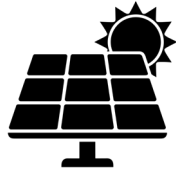

NORTHERN STAR
RESOURCES LTD

Environmental MANAGEMENT

FAST FACTS

Our planned Kalgoorlie Regional Renewable Energy Project will include a wind farm with up to 32 wind turbines capable of generating 256MW, a 110MW solar farm and 300MW-hour battery energy storage system.

AIR QUALITY

At Northern Star, we are committed to minimising impacts across our operations and within the community we live and work.

Dust monitoring is an important part of how we track and manage our impact. Our network of air quality monitoring stations measure dust and wind conditions in real-time, helping guide our teams to respond effectively.

We are continually exploring and testing additional measures to mitigate dust. In addition to operating water carts and using fixed water misters on crusher stockpiles, the team has trialled further dust suppression methods during blasting, which have shown positive results.

During hot, dry or windy conditions, we take further steps to reduce dust by adjusting or pausing dust-generating activities. Our Environment and Operations teams have been working closely with independent consultants and regulators to ensure we meet regulatory requirements and uphold our operational standards.

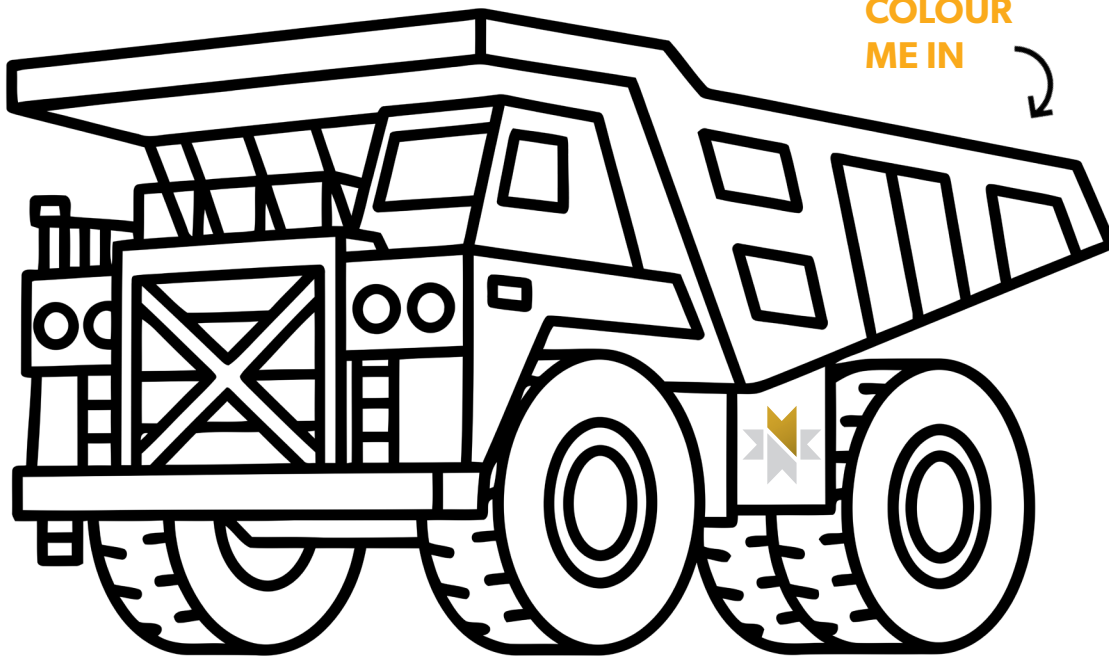

MEET OUR ENVIRONMENT TEAM

Northern Star's Environment Team in Kalgoorlie plays a key role in ensuring compliance with environmental legislation and approvals, while implementing our Environmental Management Systems to identify, monitor and mitigate environmental impacts. Working closely with operational teams, they provide guidance, monitoring and reporting to support responsible land use, continual improvement and sustainable operational outcomes.

Yvonne Hynes (Environment Manager - Kalgoorlie Region) said the opportunity to live and work in Kalgoorlie-Boulder with her family has been especially rewarding highlighting the strong sense of community, diverse career opportunities and the ability to make a real impact in a regional setting.

"I am passionate about the work my team and I do because responsible environmental management is fundamental to Northern Star's Operations" she said. "Our work is important as it helps shape the future of the region by protecting natural values, supporting regulatory compliance and delivering positive outcomes for both industry and the community".

Partnership SNAPSHOT

KIDSFEST

Gold fever struck at the City of Kalgoorlie-Boulder's KidsFest this school holidays with hundreds of locals trying their hand at gold panning with our teams.

We love supporting local events which foster such positivity and make our communities extra vibrant during the holidays.

KALGOORLIE AMATEUR SWIMMING CLUB

The Kalgoorlie Amateur Swimming Club did us proud at this year's Country Pennants in Karratha, placing second in the B Division. The swimmers' efforts were record-breaking competing in 104 races and winning 30 Gold, 25 Silver, and 10 Bronze medals.

Opportunities like the Karratha trip provide the competitive environment the KASC athletes need to bridge the gap and qualify for State Championships alongside the elite metropolitan clubs, which six swimmers competed at following the Country Pennants.

Regional travel is a significant commitment, and we are honoured to help ease that burden for families in our communities, allowing our athletes to focus on their performance.

EPIC KENNEDY PARK UPGRADES

It is great to see Kennedy Park reopened to the community after a much-needed refresh. A new ground surface, supported by our Community Investment Program and coordinated by EPIC, has helped bring life to the popular playground once more.

BINAR FUTURES

Binar Futures hosted the Goldfields Basketball Tournament in April, in partnership with the Leonora Blazers. We are proud to support both organisations, as well as a new local team in the Kalgoorlie Warriors. Bringing this two-day tournament to town was a joint effort and a great example of what collaboration can achieve.

WEST COAST FEVER

It was a sell-out crowd on February 27 when West Coast Fever returned to Kalgoorlie-Boulder for a pre-season hitout against Adelaide Thunderbirds.

Arriving in town the day before, the Fever squad visited nine schools over two days, hosting clinics, and meet and greets.

The trip was made possible through our partnership with the Gold Industry Group, supporting West Coast Fever and Netball WA.

FOODBANK WA

Helping the community learn to cook healthy food is at the heart of Foodbank WA's mission and we're proud to support it. With Northern Star's support the nom! program — designed just for kids, teaching them how to cook cheap and nutritious foods — visited Kalgoorlie-Boulder schools.

Through our long-term partnership with Foodbank WA, kids gain access to healthy foods and the skills and confidence they need to cook at home.

LET'S GROW *together.*

The Northern Star team joined forces with the Northern Star Goldfields Giants for gold panning community fun at KidsFest.
